

Memorandum For The Record

Subject:

1. (S/NOFORN) On 15 October 1980, RVer #1 informed me at approximately 1205 hours that in an earlier conversation with LTC Watt, #1 had become aware of the identity of a target object against which #1 had been targeted ~~earlier~~ during Session D. This earlier conversation occurred at approximately 1100 hours, 15 October 1980.

2. (S/NOFORN) A summary of the alleged conversation is that #1, having heard some "feedback" pertaining to an earlier session had arrived, asked LTC Watt if he could read the feedback.

LOC Watt replied negatively. #1
then asked which session
the "feedback" pertained to.

The response was the sealed
envelope session ~~done to~~ ~~to~~
#1 had done a short while
earlier. Included in this
clarification was the term 

SG1A

3. (S/NOFORN) Future sessions (if any)
targeted against P03(a) must
take into account this histor-
ical knowledgeability of #1 in
future targeting methodologies.
